DETAILED ACTION

Examiner's Amendment

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Dana Brussel on 7/23/2009.

The application has been amended as follows:

Claim 2 is replaced with --An apparatus for applying surgical fasteners comprising:

an elongated member having a proximal portion and a distal portion, and defining a longitudinal axis;

a staple storage portion attached to the distal portion of the elongated member and adapted for storing at least one surgical fastener, the staple storage portion being movable throughout a plurality of positions including a first position that is substantially aligned with the longitudinal axis of the elongated member and a second position wherein the staple storage portion defines an acute angle with respect to the longitudinal axis;

a control member spaced from the distal portion of the elongated member, wherein rotation of the control member about the longitudinal axis causes rotation of the staple storage portion and movement of the control member along the longitudinal axis from a first position to a second position pivots the staple storage portion from its first position to its second position;

an advancing mechanism configured to advance the at least one surgical fastener distally through the staple storage portion, the advancing mechanism being operable to advance the at least one surgical fastener in each position of the plurality of positions; and

an anvil configured to close the at least one surgical fastener.--;

Claim 8 is replaced with --An apparatus for applying surgical fasteners comprising:

Art Unit: 3721

an elongated member having a proximal portion and a distal portion, and defining a longitudinal axis;

a staple storage portion attached to the distal portion of the elongated member and adapted for storing at least one surgical fastener, the staple storage portion being movable throughout a plurality of positions including a first position that is substantially aligned with the longitudinal axis of the elongated member and a second position wherein the staple storage portion defines an acute angle with respect to the longitudinal axis;

a control member located in the proximal portion of the elongated member, wherein rotation of the control member causes rotation of the elongate member and movement of the control member along the longitudinal axis between first and second positions pivots the staple storage portion throughout the plurality of positions;

an advancing mechanism configured to advance the at least one surgical fastener distally through the staple storage portion, the advancing mechanism being operable to advance the at least one surgical fastener in each position of the plurality of positions; and

an anvil configured to close the at least one surgical fastener.--;

Claim 10 is canceled.

Reasons For Allowance

2. The following is an examiner's statement of reasons for allowance. The prior art of record fails to anticipate or show in combination all the features of applicant's invention:

With respect to claims 2 and 8, a novel device for applying surgical fasteners having the claimed structure in combination with a control member wherein rotation of the control member with respect to a longitudinal axis of the elongated member of the device pivots a staple storage portion located at the distal end.

The prior art of record shows similar devices with similar structure, but none are capable of performing the function of the invention and it is the examiner's opinion that it would not have been

Art Unit: 3721

obvious to one having ordinary skill in the art at the time of the invention to combine or modify the prior art in order to arrive at applicant's invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
